147 Websites and Apps to Learn Something New

The Internet has made it possible for every individual to access vital information. Be it music lessons, dancing, reading, writing, photography, or learning problem solving skills, all of this is available. All you need is a PC and an Internet connection and you can plunge yourself into any pool of information you want.

If you want to access a wide variety of useful information in a single place, this article is going to make that feasible. Here is a list of 147 websites that can help you learn almost anything you want.

[#1. Artists Network University](#)

Artists Network University has well-trained instructors to help you carve out exquisite and professional drawings that will make you stand out from the rest. Both budding and professional artists can benefit from the numerous drawing and painting tips.

Genre: Art

Learning aids: Text, video

Courses/classes available: 48

Paid courses only

[#2. CreativeLive](#)

Creativity gives birth to new ideas, and these ideas are the ones we use to make our lives here on earth better. CreativeLive has over 650 well-trained and ambitious instructors who are ready to help anyone unleash their creative potential.

Genre: Art, music, photo, craft, money

Learning aids: Text, video

Courses/classes available: 1500+

Paid courses only

[#3. Cambridge in Colour](#)

Cambridge in Colour is a distinguished learning community for photographers who are enthusiastic about taking their photo skills to the next level. In a nutshell, you'll learn how to reduce camera shake, create digital panoramas, utilize natural light, and much more.

Genre: Art, photo

Learning aid: Text

#19. Bloc

If you have no time and you need to learn Bootcamp coding quickly, Bloc can help you out. In as little as six months, you'll be able to come up with real and functional apps. You can also get an opportunity to learn Web development and design without interfering with your daytime job.

Genre: Computer programming, Web development

Learning aid: Interactive app

Number of courses: Over five

Paid classes only

#20. Code Academy

Coding is the backbone of Web development. Unfortunately, many budding Web designers find this stage a bit grueling. If you are tired of paying out huge amounts and getting very little, join over 25 million other subscribers at Code Academy and learn to code for free.

Genre: Computer programming, Web development

Learning aid: Interactive app

Number of courses: Over 10

Free classes

#21. Code Avengers

Code Avengers is a platform that gives Web developers, designers, and software engineers an opportunity to sharpen their coding skills. They have many instructors and a large community of enthusiastic learners from whom you can get help. They teach computer science basics, game development, HTML and CSS, JavaScript, Python, and many other things.

Genre: Computer programming, Web development

Learning aid: Interactive app

Number of courses: Over 10

Paid classes only

#22. Code Combat

Code Combat is one of the best online programming resources, and makes coding and computer science more fun to learn. Everything is made into a game—you play while attending lessons at the same time. Through gaming, you can get motivated to get

through any obstacle because you crave a reward. The courses are available to people of all ages.

Genre: Computer programming, Web development

Learning aid: Interactive app

Number of courses: Over 10

Paid classes only

[#23. Code School](#)

Code Schools offers high-quality video lessons that help computer science students have a firmer grip on topics like PHP, Python, Ruby, JavaScript, HTML, and CSS. Choose any topic you want and an instructor will help you through to the end.

Genre: Computer programming, Web development

Learning aid: Interactive app

Number of courses: 60+

Paid lesson only

[#24. Code.org](#)

Having problems getting started with coding? Try learning it through Code.org's one-hour video session and you'll find your ground. Code.org's tutorials are offered in over 180 countries and 45 languages. The videos' content is suitable for students of any age.

Genre: Computer programming, Web development

Learning aid: Interactive app

Number of courses: N/A

Free classes

[#25. Dash](#)

Dash is a vital resource you can use to get started with website development. They teach you how to code fabulous websites in HTML, JavaScript, and CSS. The projects are interactive and can be done right in your browser—no hustles, no payment.

Genre: Computer programming, Web development

Learning aid: Interactive app

Number of courses: N/A

Free lessons

[#26. Free Code Camp](#)

Free Code Camp is a coding platform that gives enthusiastic coders a chance to learn coding and come up with projects that can benefit nonprofit organizations. This website

offers interactive courses and other resources to help you master HTML5, CSS3, JavaScript, Node.js, and other coding technologies. All the lessons are provided for free, and you can access them at your own time and convenience.

Genre: Computer programming, Web development

Learning aid: Interactive app

Number of Courses: N/A

Free classes only

#27. One Month

If you have no time or just don't like long courses that take much of your time, you can enroll in the One Month platform and take all your coding lessons in just a month. After this period, you'll be able to build Web applications without much difficulty.

Genre: Computer programming, Web development

Learning aid: Interactive app

Number of courses: N/A

Paid lessons only

#28. Platzi

Platzi is a Web-based resource where individuals can stream recorded classes on subjects like business, programming, marketing, and code. In order to access the lessons, you need to sign up for an account with them. After the training, you will do a final project to test your acquired skills.

Genre: Computer programming, Web development

Learning aids: Text, video

Number of courses: Over five

Free lessons only

#29. Power Searching With Google

Power Searching With Google is an online search education platform that teaches you how to use Google to become an effective fact-finder. The lessons are thoroughly researched and provided in video format.

Genre: Computer programming, Web development

Learning aids: Text, video

Number of courses: N/A

Free lessons only

[#30. ShowMeDo](#)

ShowMeDo hosts countless tutorial videos and screencasts that can help one do a lot of things with Linux, Python, Java, and Ruby. The videos are simple to understand, and are created by expert individuals.

Genre: Computer programming, Web development

Learning aids: Text, video

Number of courses: N/A

Free lessons only

[#31. SitePoint](#)

SitePoint is a library of books and other resources on Web development and design. These resources sufficiently cover topics such as HTML, CSS, PHP, JavaScript, Ruby on Rails, and many other things. Currently, there are 85 books, 68 courses, and over 250 tutorials.

Genre: Computer programming, Web development

Learning aid: Text

Number of courses: 68

Paid courses only

[#32. Stack Exchange](#)

Stack Exchange is an online platform where you can ask any question and get numerous answers. The best answers are upvoted as the most helpful ones. As a member, you can either ask a question or provide your valuable insights. There are over 161 communities that are focused on answering all questions posed.

Genre: Computer programming, Web development

Learning aid: Text

Number of courses: N/A

Free lessons only

[#33. Stukio](#)

Stukio helps Web developers and designers learn coding through a hands-on approach. They have experts that take you through the ins and outs of programming languages like CSS, HTML, and JavaScript. You will also be taught how to make Web applications through real-time projects.

Genre: Computer programming, Web development

Learning aid: Video

Number of courses: N/A

Free courses only

[#34. Treehouse](#)

Treehouse hosts premium content for any Web designer or developer that wants to get a handle on grueling topics like CSS, HTML, JavaScript, Python, and iOS. You'll need to sign up for an account to get a free trial.

Genre: Computer programming, Web development

Learning aid: Interactive app

Number of lessons: N/A

Paid courses only

[#35. Learn to Code the Hard Way](#)

Learn to Code the Hard Way is an online resource that provides premium content on coding courses. Enroll to get help with topics such as Python, C, Ruby, SQL, Regex, and many more.

Genre: Computer programming, Web development

Learning aids: Text, video

Number of courses: 10+

Paid content only

[#36. MIT's EE and CS courses](#)

MIT's EE and CS courses is an online resource that provides individuals with a comprehensive list of courses available on MIT Open Course Ware. Use the "Find Courses" button to find the content you need.

Genre: Courses

Learning aid: Text

Number of courses: 1000+

Free and paid content

[#37. Beginner's Guide to HTML & CSS](#)

Beginner's Guide to HTML & CSS is an online resource that helps beginners get a good grasp of CSS and HTML programming languages. There are over 12 lessons prepared for this purpose, and each lesson takes you a step closer to becoming an expert in these two languages.

Genre: Computer programming, Web development

Learning aid: Text
